CATALOGUE  
OF PRODUCTS

[www.famed.com.pl](http://www.famed.com.pl)

The products have been manufactured  
of materials with anti-bacterial properties

# TABLE OF CONTENTS

## 1. MATERNITY BEDS

- FAMED FREYA

Innovative, fully electric combination of hospital and maternity bed.

- FAMED LM-01.4

Comfortable, robust and functional maternity bed with electrical control.

- FAMED LM-01.5

Economic and comfortable maternity bed without electric control.

## 2. BABY CRIB

- FAMED OVO 2

Baby crib providing closeness and safety.

## 3. GYNAECOLOGY CHAIRS

- FAMED FG-04

Gynaecology chair electrically controlled.

- FAMED FG-07

Gynaecology chair with electrical height adjustment.

## 4. TREATMENT CHAIRS

- FAMED FL-02

Treatment chairs with electrical height adjustment.

# Famed FREYA

## INNOVATIVE, FULLY ELECTRIC COMBINATION OF HOSPITAL AND MATERNITY BED

Famed Freya is a unique product serving as a hospital bed (conformity with PN-EN 60601-2-52) and maternity bed - comfortable and economic solution. Such versatility is possible because of independent control systems (central panel, wired remote, external and internal control panels) and wide range of additional equipment. Changing the product position or configuration is possible within seconds. Freya is a bed with stable, column structure. The bed has a built-in battery that allows you to maintain full functionality (several cycles) in an emergency situation.

### VERSATILITY

Famed Freya can be easily transformed from a hospital bed into a maternity bed and at the same time it meets the requirements of the standard PN-EN 60601-2-52 and has comfortable, lowered side rails. The base of the bed is equipped with compartments for additional accessories, all electrical cables and control elements are covered and hidden, in order to facilitate cleaning and disinfection. Famed Freya is a fully electronically controlled bed.

### SAFETY

Famed Freya is a bed with stable, column structure. Plastic parts are made of materials with anti-microbial properties using the pSilver™ technology and the mattresses are made of anti-bacterial fabrics with glued stitches. All accessories are fixed in reliable and stable manner, ensuring safe support during labour. The bed has very low minimum height which facilitates getting in and out of the bed.

### CLOSENESS OF MOTHER AND CHILD

Using the Famed Freya maternity bed together with Famed OVO newborn bed in the same room creates exquisite post-labour conditions for a mother and child. Mother may not only change the bed position but also safely bring the child closer and then put it back to OVO.

## PROPERTIES

### Equipment:

- standard accessory kit: multi-position knees support, foldable arms holders, feet supports,
- standard mattress set - including a mattress for a newborn wide mattress, which enabled comfortable relaxations for mother with her child,
- electrical control of height, back-rest and seat and Trendelenburg and revers-Trendelenburg position'
- electric extension and retraction of the foot section,
- very comfortable conditions before, during and after labour.

### Labour positions:

- semi-sitting position (1),
- squatting position using a push bar (2),
- semi-sitting position,
- sitting position (3),
- side-lying position (4),
- horizontal sitting position (5),
- kneeling position over a bar (6),
- gynaecological examination.

Length 2165 mm | Total width 965 mm | Minimum height 595 mm | Maximum height 975 mm | Back rest inclination angle 70° | Thighs segment adjustment 30° | Trendelenburg position 20° | Reverse-Trendelenburg position 20° | Maximum load 250 kg

# Famed LM-01.4

## COMFORTABLE, ROBUST AND FUNCTIONAL MATERNITY BED WITH ELECTRICAL CONTROL

Maternity bed Famed LM-01.4 is designed for obstetrics and gynaecology wards patients, both within pre-labour, labour and puerperium period. Maternity bed can be easily transformed into a delivery chair ensuring comfortable position during labour for a future mother. The compact design favors the use of this bed in smaller rooms. Famed LM-01.4 offers continuous, reliable operation thanks to its built-in battery, which is perfect for emergency situations (several cycles).

### CONTROL OPTIONS

The bed can be controlled using panels in side handrails, which enable control of height, back-rest, allow for turning the lights on and off and alarm activation. Additional functionality is provided by the remote control, which in addition to height and angle adjustment back and thigh segments has also a pre-programmed position for getting down from the bed and examination position and CPR. Easy control is also ensured by foot control.

### EXTENSIVE ACCESSORIES

Extensive accessories allow for adopting many labour positions and facilitate performing specialist labour-related, proctoscopy, gynaecology and palpatory examinations. Basic equipment includes arm holders, feet support, knees support and stainless steel bowl. Accessories can be installed on universal rails. The bed is equipped with a set of mattresses secured against penetration of fluids.

### SAFETY

Stable handrails are mounted to the backrest and can be lowered if necessary. Polyurethane pads on the hand grips prevent slipping of the hands and provide secure support during labour. All plastic and varnished elements have been made with the use of antibacterial agents in the pSilver™ technology.

Length 2170 mm | Total width 1080 mm | Minimum height 615 mm | Maximum height 985 mm | Back rest inclination angle 70° | Thighs segment adjustment 17° | Trendelenburg position 12° | Reverse-Trendelenburg position 5° | Maximum load 230 kg

# Famed LM-01.5

## ECONOMIC AND COMFORTABLE MATERNITY BED WITHOUT ELECTRIC CONTROL

Maternity bed with perfect quality/price ratio. Robust, stable and easy to clean and disinfect construction as well as no need to connect electricity, guarantee full reliability. This simple delivery bed easily converts into a delivery chair to serve the patient and medical staff during every stage of labor. Manual control, large wheels, high quality of workmanship and pSilver™ bacteriostatic technology makes the Famed LM.01.5 birthing bed suitable for all conditions.

### CONTROL OPTIONS

Height adjustment of the rest is accomplished using a hydraulic pump and foot lever. Additionally, because of the gas springs with a lock, it is possible to adjust the Trendelenburg and Reverse-Trendelenburg positions as well as back-rest inclination.

### EXTENSIVE ACCESSORIES

Maternity bed is equipped with a set of mattresses, a mattress for a newborn, arms, legs and knees supports as well as stainless steel bowl. Attaching and deattaching the accessories is made on the easy-to-use, dedicated accessory rail. The construction is stable and robust and the high quality protective materials and pSilver™ technology ensures long-term, trouble-free use and safety for a mother and her child.

### QUICK POSITION CHANGE

Famed LM-01.5 can be quickly transformed into a place ready for labour. Removal of mattress from the legs section and simple disassembly of the top enables change of the configuration and adjustment of comfortable labour position. It's a versatile solution that serves the patient and medical personnel at every stage of labor.

Length 2170 mm | Total width 1080 mm | Minimum height 580 mm | Maximum height 940 mm | Back rest inclination angle 70° | Trendelenburg position 12° | Reverse-Trendelenburg position 5° | Maximum load 170 kg

# Famed OVO 2

## BABY CRIB

### PROVIDING CLOSENESS AND SAFETY

Baby crib Famed OVO 2 provides an uninterrupted contact between mother and baby from the first moments of the infant's life. The proximity is provided by a crib made of transparent plastic and a low base that allows you to park it under the hospital bed very close to the mother. Height adjustment ensures safe adjustment of the crib to the current position of the bed. You can set it in the Trendelenburg/reverse-Trendelenburg position.

#### CLOSENESS

Famed OVO 2 is a baby crib that, thanks to its construction, allows the mother and child to be close to each other from the first moments. It also provides comfort and safety. The base goes under the bed, so the crib is very close to the mother, ensuring uninterrupted eye contact from the first moments.

#### SAFETY

Simple and effective design is perfectly combined with functionality, safety and ease of cleaning (key mechanisms are hidden in the construction) and resistance to disinfectants. Wheels with a diameter of 75 mm allow you to gently cross the hospital corridors, all of them have individual locking mechanism.

#### ADJUSTMENTS

Comfortable, gas-spring assisted height adjustment allows you to lift/lower the crib to the current setting of the bed. With a quick hand move, you can also tilt the crib to a 12° angle. A version with a gas spring adjustable inclination is also available.

Length 814 mm | Width 476 mm | Height (min.) 925 mm | Height (max.) 1225 mm | Trendelenburg/reverse-Trendelenburg 12°

#### Equipment

- white mattress, resistant to disinfecting agents, waterproof,
- metal basket for personal items, mounted on the leg.

# Famed FG-04

## GYNAECOLOGY CHAIR ELECTRICALLY CONTROLLED, WITH MEMORY

Chair on mobile base with central lock of the drive system facilitates effective movement of the chair around a treatment room and the built-in electrical actuators allow for precise changing and keeping a position, without any effort from the staff. The chair has an optional built-in battery power supply that allows you to perform several cycles of movements in emergency situations.

### CONTROL

The required functions of the chair can be achieved by means of built-in electric actuators controlled from the wired remote or foot controller (optional). Using one button on the remote control, you can set the chair to the Trendelenburg position, entry/exit position and program a custom one. Electrical adjustment includes: change of chair height, adjustment of the seat and backrest angle.

### COMFORT

The one-button controlled seat position on the remote control allows to obtain very low position of the front edge of the seat, which can significantly ease up the process of getting in and out of the chair. Also a custom position can be programmed to suit the doctor's preference and can be activated with one button on the remote control. Additionally, seamless upholstery and disinfectant-resistant materials in pSilver™ technology help to keep the chair clean

### PLENTY OF ACCESSORIES

The chair is equipped with a stainless steel gynaecology bowl, roll of lining paper located on the holder in a dispenser under the back-rest and rails for installing equipment in the seat and back-rest. The chair can be equipped with extra lower leg section (removable), knee rests, foot rests, foot control or urological bowl. A standard-sized accessory rails allow the use of other typical dedicated accessories or handles.

Length 1750 mm | Total width 745 mm | Minimum height 560 mm | Maximum height 860 mm | Back rest inclination angle 65° | Trendelenburg position 10° | Reverse-Trendelenburg position 65° | Maximum load 200 kg

# Famed FG-07

## GYNAECOLOGY CHAIR WITH ELECTRICAL HEIGHT ADJUSTMENT

Mechanically controlled chair using actuators supported by gas spring with a lock. Moreover, it is equipped with electrical adjustment of height using a foot controller, reducing time and facilitating personnel work.

### POSITION CHANGE

Gas springs can be used to change the position of the chair as required, and the height of the chair is electrically adjustable. Thanks to the lockable gas springs, the backrest tilt, the seat and the Trendelenburg and reverse-Trendelenburg tilt can be adjusted smoothly

### MATERIALS QUALITY

Seamless upholstery and shape of covers facilitate cleaning the chair. The applied materials are 100% resistant to disinfecting agents. Moreover, it is possible to customize the chair by selecting the colour of upholstery from a wide range of colours.

### EXTENSIVE ACCESSORIES

The chair, in its basic version, is equipped with a gynaecology bowl of stainless steel, paper holder behind back-rest and rails for installing equipment in the seat and back-rest. Additionally, it can be equipped with knees, arms and feet supports as well as with urology bowl.

Length 1745 mm | Total width 780 mm | Minimum height 660 mm | Maximum height 1060 mm | Back rest inclination angle 70° | Trendelenburg position 18° | Reverse-Trendelenburg position 14° | Maximum load 175 kg

# Famed FL-02

## TREATMENT CHAIR WITH ELECTRICAL HEIGHT ADJUSTMENT

Ophthalmology and laryngology chair with electrical adjustment of height and back-rest as well as rotation option up to 90°.

### ELECTRICAL CONTROL

Electrical functions allow for saving time and facilitate works of the treatment room personnel. Adjustment is performed using an easy to use foot controller.

### OPTIONS

Seat of the chair can be rotated by 90° in relation to the base, which facilitates access for diagnostic instruments. Moreover, head rest adjusted in many planes and inclination or removal of arm support positively affect ergonomics of work and comfortable access to a patient.

### QUALITY

Seamless upholstery ensures long-term use and comfort for a patient. Structure of the chair is made of powder paint coated steel and the covers of the base, back-rest and seat are made of ABS plastics which due to the pSilver™ technology improve cleanliness in a treatment room.

Length 710 mm | Upholstery width 540 mm | Minimum height 500 mm | Maximum height 650 mm | Back rest inclination angle 90° | Maximum load 160 kg

## Technologies applied in the products:

### pSilver™

All ABS elements were made using pSilver™ technology. The prefabricate contains silver nanoparticles, which we use in the process of plastics production, provides effective bacteriostatic protection. The use of pSilver™ technology in the places that are most often touched by patients limits the proliferation of dangerous bacteria, fungi or viruses. The pSilver™ technology also involves a process of plastic element processing providing a smooth surface, whose texture prevents the accumulation of impurities.

### fCharge™

All battery cells powering Famed Żywiec products are carefully selected from a reliable supplier we have been cooperating with for many years. Each fCharge™ battery cell undergoes inspection at an external company, then goes through multiple tests at several technology departments of our factory. The fCharge™-fast charging technology charger used in our products allows for quick supply of the necessary amount of electricity to carry out the first treatments. A minimum of several dozen guaranteed full work cycles ensures safety in the course of performing every medical procedure.
